Creating a Story

Your task is to create a story using multiple sprites and stages. When the green flag is clicked, a story will unfold lasting 3-4 minutes. In this project, you will need:

- 1) 4-5 stages
- 2) Multiple sprites and representations
- 3) Movement of sprites
- 4) Speech/Think blocks
- 5) Broadcast features

Step 1: Who is in your group?

Step 2: [Choose a story](#). Which story did you and your group choose? In 2-3 sentences, explain the basic plot of your story:

Step 3: Who are your characters? Describe each character in 1-2 sentences.

Step 4: How are you going to break up your story? Explain in 3-4 sentences what will be occurring on each stage:

Stage 1:

Stage 2:

Stage 3:

Stage 4:

Stage 5 (if necessary):

Step 5: Designate a group member per stage.

Step 6: Import all blocks onto one project so when the green flag is clicked, the story unfolds.

Advanced: Can you use sounds instead of speech blocks?

Rubric:

100 - Your story is 3 minutes in length. 4-5 different stages have been used artistically. Multiple sprite representations are used in a way that shows many perspectives of the characters. Movements of sprites are entertaining and effective. The story is engaging and thoughtful. 2-3 sounds are used per stage. The entire story can run off one program.

95 - Your story is 2-3 minutes in length. 4-5 different stages have been used effectively. Sprite representations are used in a way to enhance the story. Movements are effective. The story is engaging. 1 sound used per stage. Most of the story can run from one program.

90 - Your story is 2-3 minutes in length. 4-5 different stages are attempted. Sprite representations are effective. Limited movements of sprites that can be used more effectively. The story is effective. The story has to be run from individual programs.
